Subject: FW: West Lake Landfill: Copies of newspaper articles on SFS availability

Hattie,

I am the MDNR Project Manager for West Lake Landfill. After looking at the EPA website for the West Lake Landfill Supplemental Feasibility Study that was given in the Post-Dispatch notices, I had some questions/suggestions for consideration. I sent these to Dan Gravatt (my EPA counterpart) who informed me that such correspondence should be sent to you in light of recent MDNR to EPA coordination regarding community involvement issues. My main questions/suggestions are as follows:

1. Will EPA be developing a fact sheet to explain the purpose of the SFS?
2. Suggest including a link to "text only" version of the SFS to reduce file size for those with lower internet connection speeds.
3. Has the Administrative Record at the Bridgeton library been updated with a hardcopy of the final SFS?

Thanks for your attention to these items.

I checked out the link in the Post-Dispatch ad and was wondering if EPA will be developing a fact sheet for West Lake Landfill to explain the purpose of the SFS? It may help answer questions without having to open the SFS document which takes a considerable amount of time to download even with high speed connection. Another suggestion would be to add a link to the webpage with text only version of the SFS to reduce file size. My final inquiry is to verify that a hard copy of the SFS has been placed in the Admin Record at the Bridgeton library.

Thanks,

Shawn Muenks, P.E.

Shawn, here they are as you requested. Sorry the copy quality isn't that good; the copies I received are very dark and the lightening process on the copier didn't help much.

(See attached file: Post-Dispatch Ads for SFS.pdf)
